### What have you learned?

- How and why HTTP can be used to build web applications
  - Methods, status codes, headers, etc.
- How HTTP features can be used to build web infrastructures
  - Reverse proxies, load balancers, caching, scalability, etc.

## What have you accomplished?

- You have acquired and set up a server on the HEIG-VD network
- You have created a simple (CRUD) API to deploy on your server
- You have acquired and configured a domain name to use for yourself
- You have deployed your API on your server
